VascuTouch is a quick and effective treatment for the removal of superficial skin lesions.

THE VASCUTOUCH PROVIDES AN INEXPENSIVE means to quickly and easily remove vascular lesions such as Telangiectasia, cherry angiomas, spider veins, and skin tags found on the face and body. The **VascuTouch** yields superior results when compared to other devices that commonly cause scarring and hypo or hyperpigmentation. When compared to laser treatment, the **VascuTouch** produces similar results with minimal pain or high treatment costs. The **VascuTouch** is an indispensable tool for treating cosmetic vascular problems.

Easy to learn procedure removes telangiectasia, cherry angiomas, spider veins and skin tags.

HOW LONG DOES A VascuTouch TREATMENT TAKE?
Most blemishes are removed in seconds. Depending on the number of capillaries, most conditions can be successfully and permanently corrected in one or two sessions.

THE VascuTouch IS AN EFFECTIVE TREATMENT TO REMOVE UNSIGHTLY SKIN BLEMISHES. This quick and simple procedure will not cause scarring or hyperpigmentation. **VascuTouch** uses very low levels of Radio Frequency (RF) to desiccate the lesion with no damage to surrounding tissue.
