

LightStim Professional Anti-Aging Light

LightStim Professional Acne Light

LightStim Professional Combo Light

Advantages to LightStim LED Light Therapy:

- A 20 minute treatment time that does not require an esthetician's time.
- Increase the results provided by your other facial treatments.
- Increase profits.
- Increase client loyalty.
- Stand apart from the competition.
- Bring in new clients looking for Light Therapy.
- Enhance the benefits, thereby increasing the sales, of your current skin care lines.

Options to Increase your Profitability:

- An add-on to your existing menu of treatments including facials, IPL, laser, peels, dermabrasions, acne facials for an additional \$20.00 to \$75.00 and up relative to the demographic.
- Offer busy clients a 20 minute mini-facial and 20 minute LightStim LED light treatment. Total time 45 minutes.
- Offer a 10 treatment package of Professional LightStim LED treatments.
- Offer three free Professional LED light treatments with the purchase of a hand-held LightStim LED Light.
- Hands-free enabling one to administer two billable services at once such as a hand, arm or foot massage while receiving LightStim LED light treatment.
- Allows one to start on another client in a separate room while another is receiving LightStim LED light treatment.
- Include with the existing menu of treatments at no charge to bring new business in and stand apart from the competition.
- By adding LightStim light therapy to your existing treatments your clients will immediately see the benefits of LED light therapy opening the door to retail sales of the hand-held Anti-Aging, Acne and Rosacea Lights.
- Have a LightStim Representative educate your staff and estheticians on LED light therapy at your next company meeting. A more educated staff equals more sales, a better educated clientele and most importantly, happy clients!

The Professional Lights

PROTOCOL

LightStim products are sold to the professional where skin care treatments and services are offered. Independent estheticians, spas, medical spas, plastic surgeons, medical and dermatology offices are all candidates for LightStim LED light therapy. Adding LightStim to the menu of services creates several opportunities to increase profits.

Enhance your existing facial treatments with a 20 minute session of LightStim light therapy, resulting in the rejuvenation of cells and increased cellular activity and vitality. LightStim light therapy will improve treatment results and give your clients a soothing, calming and more satisfying overall experience.

Use as the final treatment following any of the procedures below. Use in conjunction with deep moisturizers, hydrating products, collagen producing products, collagen masks (transparent), etc., to greatly increase efficacy and treatment results. Acne treatment products would be used AFTER LightStim LED light treatment to eliminate possible irritation and drying of the skin.
